Environmental Science

How will climate change affect us in 2030?

What does climate change mean for the tropics? What will our region look like into the future? How will it affect us, and what about our children?

Organised by **CRC Reef** and the **Rainforest CRC** with support from the **Great Barrier Reef Marine Park Authority**, a free public forum will be held to hear leading experts discuss the impacts of climate change for Townsville and the wider community and identify initiatives and potential solutions.

This entertaining and informative event will be hosted by Alexandra de Blas, ABC Radio National's environment specialist, and include perspectives from regional scientists, local and state government representatives and protected area managers.

Venue: Victoria Park Hotel, Boundary Street, South Townsville

Date: Tuesday, 22 November 2005 from 7pm to 9pm

All members of the community are encouraged to attend. Meals will be available for purchase from the hotel prior to the event and the bar will be open.
